future.now

Digital skills directory

The digital skills directory

Our digital skills directory is split into two sections:

01 A summary matrix

to help you view the digital skills providers vs. the skills they address

02 Directory pages

A one-pager highlighting the services of a selection of digital skills providers within the FutureDotNow coalition

If you would like to showcase your tools/services here please do so by filling out this form.

Summary matrix

This matrix plots digital skill providers against the level of digital skills they offer and whether their provision can be used to 01 **baseline your organisation's current skills** 02 **upskill individuals** or 03 **offer a formal qualification upon completion.**

Nature of offer	Aligning digital skills providers to the specific skill areas – and the process steps they support		
	01 **CAN BE USED TO** baseline current skills	02 **CAN BE USED TO** upskill individuals	03 **OFFERS A** formal accreditation

Accenture
Digital Skills for Work and Life

accenture

Free Service

Level	Essential Digital Skills

What it does

Accenture Digital Skills is a free, interactive series of courses which help and prepare people to build the digital skills necessary to gain a job or start a business. This introductory course helps users explore the meaning of "digital", how it is integrated into our day-to-day lives and how digital is changing the world of work and the opportunities these bring.

How it helps

This course is for anyone looking to understand how they can develop the skills to thrive in the digital world of work, whether you're preparing to enter the workplace or looking to change jobs or careers. Users can start the courses straight away and learn at their own pace, before going on to access seven further topics on basic digital skills.

How to access

You can access the 'Digital Skills for Work and Life' course **here**.

Who to contact

Find out more by visiting the **website** or contacting **DigitalSkillsUKI@accenture.com**.

Barclays
Digital Eagles Programme

BARCLAYS

Free Service

Level		Essential Digital Skills

What it does

Barclays Digital Eagles are passionate about empowering people to be more confident with technology and to move forward in the digital world. The programme and resources available will give users and organisations the opportunity to explore technology in an environment that suits them. They're helping to bridge society's digital skills gap and address the issue of digital exclusion. There are Digital Eagles located across the UK who are ready to help.

How it helps

This programme is available to all and offers digital skills content and resources to help you embrace the ever-changing digital world. The content covers a number of digital topics to help you in both your personal and work life. The Digital Wings platform can support both individual users and also organisations as part of a structured learning programme. Organisations get a unique company code so it's easy to manage your team's learning. You can also get multiple codes to track different groups.

How to access

You can access information about the Digital Eagles programme, their content and resources via their website **here**.

You can access and sign up to Digital Wings **here**.

Who to contact

You can contact the Digital Eagles here **digitaleaglehq@barclays.com** or the Digital Wings team here – **digital.wings@barclays.com**.

City & Guilds
Step into Digital Technologies

Free Service

Level	Essential Digital Skills

What it does

Step into Digital Technologies is a short online course, which helps people to understand the career opportunities available in the digital and IT sector and learn how they can move into this fast-growing industry. This introductory course focuses on the different jobs available in digital network, infrastructure and cyber security, the learning that can lead to these jobs and the pathways available to build a career in the sector.

How it helps

This introductory course is for anyone considering a career in digital and IT or looking to gain a greater understanding of the sector. Covering topics like 'what is digital' and 'becoming a digital problem solver' it will help people reflect on which skills they need to develop personally and professionally and help them understand key myths and jargon from the digital sector. For those looking to switch career or enter the workforce, it will help them learn about the most in-demand jobs and progression opportunities available in the industry.

How to access

You can access the course on the **FutureLearn platform**.

Essential Digital Skills Ltd.
elearning or hybrid online learning provision

Level	Essential Digital Skills

Paid for Service*

What it does

Our mission is to help businesses to address their Digital Skills Gap by enabling their workforce to upskill and increase their productivity. We implement this by working with organisations to plan and roll out their digital inclusion and transformation programmes, supported by online or hybrid training.

These training programmes can optionally be structured to meet the government requirements for funding. Essential Digital Skills Limited is the Digital Skills online training arm of Barefoot eLearning

How it helps

Our digital platform is scaleable, cross-device and enterprise-ready, and login can also be via Microsoft 365 credentials. The platform provides online learning delivered by short videos, with access to over 1400 lessons. The interface is user friendly, and the online courses can be followed anytime and anywhere. The system provides full tracking and reporting. Other options include transcripts, tests and supporting electronic materials

.

How to access

Fire Tech

Level		Essential to Advanced Digital Skills

firetech

Paid for Service

What it does

Fire Tech run tech camps to help young people create brilliant things with tech. Courses give learners exposure to the latest tech at a range of levels to suit all abilities. These are run in full-time, part-time, or self-study formats. All courses are also available to adult learners and employees on request. Fire Tech also run virtual work experience programmes, which give people the skills they need to thrive in tech careers. These immersive courses offer learners exposure to what it's like to work on challenging projects within a games design studio, creative studio or tech start-up.

How it helps

The Fire Tech project-based courses cover the latest topics like AI, games design, VR and machine learning, while developing essential skills like teamwork, problem solving and creativity. Learners will be guided by inspiring young tutors, who might be Forbes 30 Under 30 tech entrepreneurs, design engineers from Imperial, or PhD researchers from Cambridge. Students work together to complete challenging projects, and enjoy exposure to the latest technologies that are shaping the future.

How to access

For more info about Fire Tech's courses, visit their website courses **here**.

Find out more by **emailing** the Greengage Digital team or by visiting their **website**.

〈 **Back to Directory**

Hurdle

Level | **Essential to Advanced Digital Skills**

Paid for Service

What it does

hurdle is a live virtual classroom tool that has been specifically designed to facilitate the learning of software applications. Within hurdle, learners can practice scenarios using a virtual computer whilst the instructor is able to present, demonstrate and validate the learning in real time. The instructor can control the narrative of the session which leaves the learner free to focus on practicing the software application they need to learn. hurdle can be deployed as a SaaS (software as a service) or PaaS (platform as a service) solution giving the flexibility organisations require.

How it helps

With hurdle being a tool that can be used either remotely, on site or as a combination of both this provides the flexibility employees often need when being asked to attend training, whilst also encouraging full inclusivity of employees regardless of their location.

What better way to learn and improve digital skills than through a digital platform that is easy, simple and effective to use. The virtual computer allows hurdle to be pre-configured and have the relevant software installed, ready to use with no need for any added complexity of installing software before the session begins. The learner is good to go.

Email hello@hurdle.live

⟨ **Back to Directory**

iDEA Foundation

| Level | | Essential to Advanced Digital Skills |

Free Service

What it does

The Inspiring Digital Enterprise Award, known as iDEA, is a programme helping people develop digital and enterprise skills and discover new talents through an approachable, award-winning EdTech platform that is free for learners everywhere. iDEA.org.uk offers bite-sized, interactive modules on a range of topics that are created with industry experts and innovative employers. iDEA rewards learners with a digital badge and points for every module that they complete. Learners can download, print, and share a portable Record of Achievement and when they have collected enough points and badges, they will unlock an industry-recognised Bronze or Silver Award. Gold is coming soon.

How it helps

iDEA is very flexible and easy to work with. You don't need specialist IT skills or equipment to run sessions because the modules (badges) are all self-explanatory and can be completed on any device if it's connected to the internet. Organisations can track learner progress in one place through iDEA's Organiser Management System. It's intuitive and easy to use whether you are running the programme solo or as part of a team.

How to access

All courses can be accessed online.

The Lloyds Bank Academy
Digital Skills Training Courses

LLOYDS BANK

Free Service

Level		Essential to Advanced Digital Skills

What it does

Lloyds Bank Academy is a free service to help individuals and small businesses learn digital skills. The Academy's objective is to increase the UK's productivity and bridge the digital skills gap. To achieve this it delivers a number of signature actions aimed at providing an environment for individuals, charities, businesses and communities to improve their digital skills, promoting their social mobility and productivity in both work and life.

The Academy is about helping everyone for tomorrow. By supporting digital skills the Academy prepares today's workforce for the future with skills that are desired by organisations at all skill levels. The Lloyds Bank Academy trains people by providing basic, workplace and specialist skills. These will support journeys that start at any level of understanding, for everyone in society.

Our partners are key to this approach; we are delivering the Academy with national and local partners to bring together a holistic learning hub that will drive skills throughout the UK. Working with national and local partners to enable us to reach users across the UK to secure commercial partnerships for success.

How it helps

Both offline and online training are available. The Academy is free to access for anyone, there is no requirement for users to be Lloyds Bank customers. The Academy gives everyone an opportunity to learn and develop new digital skills.

Media Trust
Volunteer Platform/Resource Hub

Free and Paid for Services

Level		Essential to Advanced Digital Skills

What it does

The Media Trust Volunteer Platform matches charities looking for comms support, with skilled Media and Creative industry professionals who volunteer their skills and time. The Resource Hub provides free guides, toolkits, blogs and tips to help charity sector workers enhance their knowledge, stay informed about trends and developments and gain advice from a range of communications experts.

How it helps

The Volunteer Platform provides a space for charities to receive 1-1 mentoring, training, advice and support for their specific needs and challenges. Media Trust volunteers are media, communications and creative professionals who want to share their skills to bring about positive social impact. Charities can request support from our community of volunteers to help them with all kinds of communications support, from designing a logo, developing a communications strategy, pitching a press release, making a film or creating social media content.

How to access

Access the **volunteer platform** or **resource hub** online.

Pearson

Essential Digital Skills Online Course (iEDS)

Level	Essential Digital Skills

Paid for Service

What it does

This online interactive learning tool is available across the 5 Skills Statement areas that are considered the most vital for adult digital skills (Using Devices, Creating and Editing, Communication, eTransactions, and Being Safe online).

The iEDS is fully mapped to EDSQ (Entry and Level 1) and can be used by employers and training providers to upskill their learners in an interactive and digitally immersive way.

How it helps

The iEDS is fully online and can be taken by employees in their own time, or as part of a blended learning solution. Your trainers can teach the topics and then use iEDS to allow learners to practice using the technology in an immersive way.

The courses are fully structured and take away the hassle of lesson planning.

PIX

Level	Essential Digital Skills

RE_
LOADED

Paid for Service

What it does

Our goal with PIX is to contribute to closing the digital skills gap. PIX is an online platform designed to assess, develop and certify digital skills. Based on the European DigComp digital competence framework (EDS compatible), it features a library of 600 learning outcomes distributed over 16 skills. You can assess your workforce's skills and identify gaps while training them thanks to immersive challenges and tutorials. PIX provides specific features for organisations: bespoke campaigns and quizzes that fit your needs, detailed dashboards, support and experience transfer plus access to 25 themed courses covering the main themes of digital.

How it helps

The PIX platform is tailored to adult learning: it's learning by doing and questions are real-life situations with immediate pay-offs. Users proceed at their own pace and can choose the subjects they want to learn about. PIXPro benefits everyone at every skill level: the platform features an algorithm that adjusts the questions' difficulty to the user level on the fly. They are constantly challenged but never stuck. And mistakes are opportunities to learn: we recommend tutorials along the way that match user's results to help them improve faster. Each user generates his/her own digital skills profile to showcase his level.

Zoe Amar Digital
Digital Skills For Charity & Social Sector Leaders

Paid for Service

Level		Essential to Advanced Digital Skills

What it does

Zoe Amar Digital is a social enterprise and digital consultancy which helps charities and other non-profits lead digital change successfully by developing robust strategies. It helps leaders develop the confidence and skills they need to lead digital transformation and to help their teams learn, collaborate and grow. As well as consultancy in this area, the team offer pro bono help through their work on **The Charity Digital Code of Practice**, their annual barometer of digital skills across the charity sector **The Charity Digital Skills report** and their leadership programme for social sector leaders with The School for Social Entrepreneurs, **Third Sector Digital Leaders**.

How it helps

Their resources and training help charity and social sector leaders develop their skills, confidence and leadership. They support them in helping them develop a clear vision of where their organisations need to get to, how to get there and what resources and skills are required to make this happen.

How to access

All resources can be accessed **online**.
